Email Portfolio

### **Education**

**B.Tech**, CSE | IIT Jodhpur Aug'19-Present

CGPA(Ongoing): **8.85**/10

Class 12<sup>th</sup> | Dehradun public school Mar'18-Mar'19

Percentage: 96.4%
Technical Skills

Languages: Python, C/C++, HTML/CSS, Javascript, Haskell, Prolog

Tools and Frameworks: Pytorch, Sklearn, Numpy, Pandas, Matplotlib, Seaborn, Regex, Heroku, Git,

Github, Firebase, Mongodb, Mysql

Familier with: Tensorflow, Java, React, Nodejs, Google Colab, OpenCV

## **Experience**

**Light weight CNN architecture for diagnoses of Chest Radiographs** | Pytorch, Python,

Torchvision, Numpy, Matplotlib

Mentor: Dr. Angshuman Paul | IIT Jodhpur

Jun'21-Mar'22

- Task to design a Lightweight CNN model for the abnormal detection of Chest Radiographs
- Implemented various architectures like Squeezenet, Mobilenet, Resnet
- achieved 72% accuracy with the fine tuning of the architectures

## **Projects**

Mask-NoMask Detection | Github | Pytorch, Numpy, PIL, Matplotlib, Python

- Detected around 5300 images under masked and no masked category with an accuracy of 99.6%
- Used transfer learning with Mobilenet v2 for classification task
- Combined the trained model with OpenCV for real time classification

Skin Cancer Detection | Github | Pytorch, Numpy, Matplotlib, Python

- Detected around 10000 images under the 7 diseases with an accuracy of 73.9%
- Used transfer learning with squeezenet and mobilenet for classification

CNN Algorithm Comparison | Github | Pytorch, Numpy, Matplotlib, PIL, Python

- Compared 7 deep CNN architectures on Retinal Eye disease dataset
- Coded Squeezenet, Mobilenet, Inceptionnet, Shufflenet, Googlenet, Resnet,
   Efficientnet from scratch
- performed a comparison study among the state-of-the-art deep CNN architectures

Image Colorization | Github | Pytorch, Numpy, Matplotlib, PIL, Python

- Converted grayscale image to colored image using GAN architectures
- used pix2pix GAN from scratch for the colorization task
- performed colorization on LAB and RGB image format

**PRA-Visualizer** | **Github** | **Url** | React, Nodejs, HTML, CSS, Firebase

- Implemented a **Page replacement algorithm visualizer** which simulates various page replacement algorithms given **Frames** and **demand pages**
- Implemented 10 algorithms including LRU, Working set, FIFO etc.

#### **Course-works**

Pattern recognition and Machine learning, Deep Learning, Database, Operating systems
